50X1-HUM

1. In addition to the existing merchant marine wireless station at Fiume a new wireless station has been established in the Port Authority building (Lucka Kapetanija) at Split. The object of the station is to maintain both official and private wireless telegraph and telephone communications with vessels at sea.
2. The station works uninterruptedly; the wave length is 600 meters.
3. The station is supplied with electricity from the town system but a new auxiliary and independent power station to strengthen the present transmission is under construction. Aerials have been erected on the roof of the Port Authority building at heights of twelve and five meters. The work has been carried out by Yugoslav engineers.
